### DETAILED ACTION

1. Claims 1-12 are pending.
2. **Please Note:** In an effort to enhance communication with our customers and reduce processing time, Group 1640 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Paula Hutzell, Ph.D., Supervisory Patent Examiner at Paula.Hutzell@uspto.gov or 703-308-4310. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.
3. Prior to setting forth the restriction requirement, the following is noted. The preamble of claims 11-12 recites "the use of the immunogen". For examining purpose, "use" claims are considered method of use.

#### *Election/Restrictions*

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a hypoallergic immunogenic molecule derived from Phl p 6, classified in Class 530, subclass 300.
  - II. Claims 7-10, drawn to a method for hyposensitized a mammal suffering from IgE mediated allergy using Phl p 6 allergen wherein the Phl p 6 molecule has an N-terminal deletion, classified in Class 424, subclass 275.1.
  - III. Claim 11, drawn to the method of using the immunogen derived from the Phl p 6 allergen or the immunogenic molecule combination for the in vitro diagnosis of type I allergy in a mammalian individual, classified in Class 435, subclass 7.92.
  - IV. Claim 12, drawn to the method of using the immunogen derived from the Phl p 6 allergen or the immunogenic molecule combination for preparing a medicament, classified in Class 530, subclass 300.

Art Unit: 1644

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Groups (II-IV) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in materially different process such as treating allergy as claimed. In the instant case, the product as claimed can be used in materially different processes such as the various uses in Groups II-IV.

Therefore, they are patentably distinct.

Inventions of Group II-IV are different process. They differ with respect to ingredients, process steps and endpoints to achieve different goals. Therefore, they are patentably distinct.

5. Because these inventions are distinct for the reasons given above and the searches are not co-extensive, restriction for examination purposes as indicated is proper.
6. A telephone call was made to Mary Armstrong on July 31, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.
7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong Huynh "NEON" whose telephone number is (703) 308-4844. The examiner can normally be reached Monday through Friday from 9:00 am to 5:30 p.m. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful; the examiner's supervisor, Christina Chan can be reached on (703) 308-3973.

Art Unit: 1644

Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 receptionist whose telephone number is (703) 308-0196.

10. Papers related to this application may be submitted to Technology Center 1600 by facsimile transmission. Papers should be faxed to Technology Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform to the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center telephone number is (703) 305-3014.
